

Job Title: Deployment Engineer

Location: Singapore

What You'll Do

- Deploy and install autonomous robots and industrial humanoid at customer sites worldwide.
- Travel extensively and spend extended periods (weeks or months) on-site.
- Troubleshoot and repair mechanical issues — cables, wheels, and other components.
- Set up networks and ensure systems are properly connected.
- Perform functional tests and maintenance checks.
- Work closely with the Head of Robotics and team to deliver seamless deployments.
- Document your work and support customers through the rollout process.

What You Bring

- Willingness and ability to travel extensively and work on-site internationally for long periods.
- Basic understanding of autonomous robots and industrial humanoid.
- Knowledge of networking and connectivity basics.
- Hands-on skills for mechanical adjustments and repairs.
- Eagerness to learn — we'll train you on our UI and deployment processes.
- Problem-solving mindset and ability to work independently.
- Strong communication and teamwork skills.

Why Join Us?

- Work directly with cutting-edge robotics and embodied AI.
- Travel the world while delivering impactful technology.
- Join an innovative, passionate team driving real change.
- Grow your skills in a fast-paced, high-tech industry.
